

Initial Build Review Notes

Director: Sol Bae

Designer: Manuel Lopez

- All list elements: to be styled with images and captions
- Add in some sort of hover state, which reveals images
- “Types of Tteok” page: make list a 2x2 grid
- Make descriptions shorter so amount of information for each subpage is consistent (some tteok types have less content available than others)
 - Focus on visuals/images, blow up images so there’s less negative space
- Adding in the visual line that we talked about in previous meeting
 - Add in that empty space
- Adding in backgrounds to the other subpages, same style as homepage
- Small note: nav bar loses gradient in other subpages
- Add in footer (with sources)
- Generally no major notes on changing content or visual style; heading in good direction
